

Smilio A – Timekeeping is a system of 5 connected buttons which guarantees a more efficient monitoring of staff interventions, notably on distant sites: proof of presence (clocking of arrivals / departures), authentication through a unique 5-digit code.

The central button can be configured as a call button or report any problem that needs a particular corrective action. Thanks to an integrated badging device, Smilio A can also be used by employees equipped with magnetic badges. Some SMS/Email alerts can be automatically triggered in case of abnormalities, thereby enabling better emergency management (replacements, delays) and appropriate communication towards final customers. With Smilio A – Timekeeping, you likely have trusted indicators to demonstrate your engagements and optimize your quality of service.

## Unique benefits:

Dual mode Sigfox / LoRaWAN wireless technology. No wifi, no 3/4G, no infrastructure work required before installation

“Proof of Presence” Technology: integrated magnetic sensor for staff time-stamping

Buttons without moving parts + antibacterial treatment = record hygiene and durability

Up to 6 years battery life (not included)

Inopportune voting filtration system

Remote configuration via Downlink

Indoor or outdoor installation (IP65)

Resistant to temperatures from -25°C to +70°C

## Technical details

Communication: LoRaWAN / Sigfox networks (EU863-870 – US902-928 – AS923)

Antibacterial treatment

“Proof of Presence” Technology: integrated magnetic sensor for staff time-stamping

Remote configuration via Downlink

Multiple fixing possibilities (horizontal/vertical)

Made in France and CE certified

Material: antistatic and anti-UV ABS polymer

Box color: white

Dimensions: 100 x 100 x 45 mm

Weight: 200 g (without batteries)

3 LED lights for the confirmation of votes

Up to 6 years battery life (not included)

Battery type: 3,6 V AA Lithium Thionyle Chloride

Hermetic (IP65) and Resistant to temperatures from -25°C to +70°C
